Interrog.AI

An AI that suggests and drafts objections to interrogatories during the discovery phase of civil suits.

CIVIL LAWSUIT

Initiation of a Lawsuit

Discovery
(can last years)

Trial

-Complaint
    Plaintiff files a complaint
-Response
    Defendant files a response
-Answer
    Plaintiff files an answer

Discovery: similar to an investigation → information gathering through:
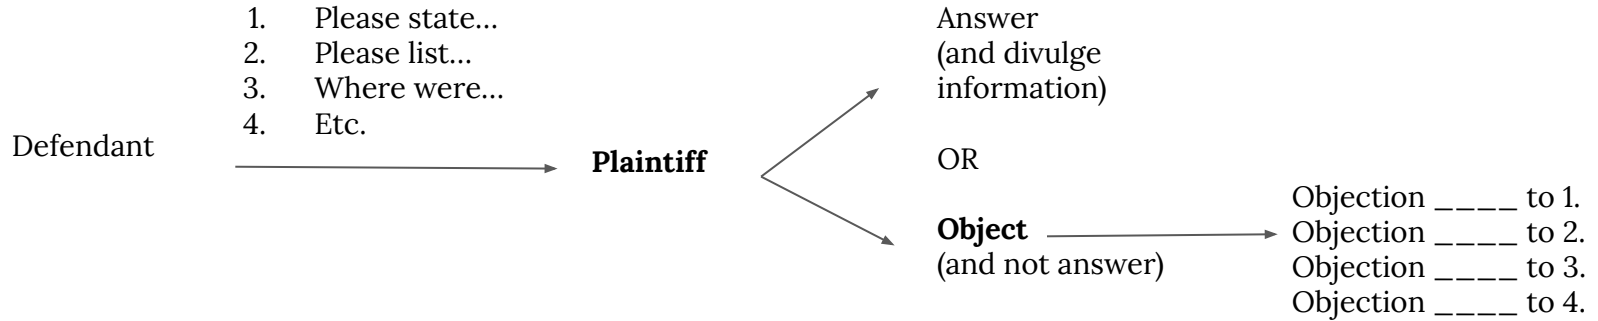

-Interrogatories
-Document production
-Interviews

Interrogatories ("questions")
Each party asks a written set of questions to the other to gain information about the event at issue.

INTERROGATORIES
("questions")

Each party asks a set of questions to the other to gain information about the event at issue. These questions are subject to state or federal law.

1. Please state...
2. Please list...
3. Where were...
4. Etc.

Defendant →

Plaintiff

Answer
(and divulge
information)

OR

Object
(and not answer) →

Objection _ _ _ _ to 1.
Objection _ _ _ _ to 2.
Objection _ _ _ _ to 3.
Objection _ _ _ _ to 4.

PROBLEMS

-Time sensitive! Most answers to interrogatories must be submitted within 30 days. For landlord/tenant disputes, as little as 5-10 days.
-Missed objections (attorneys don't know what to object to)
-Wrong objections (attorneys provide incorrect objections)
-Non-responsive (attorneys fail to object or answer, which may result in automatic admissions or sanctions)

CRAFTING PROPER OBJECTIONS
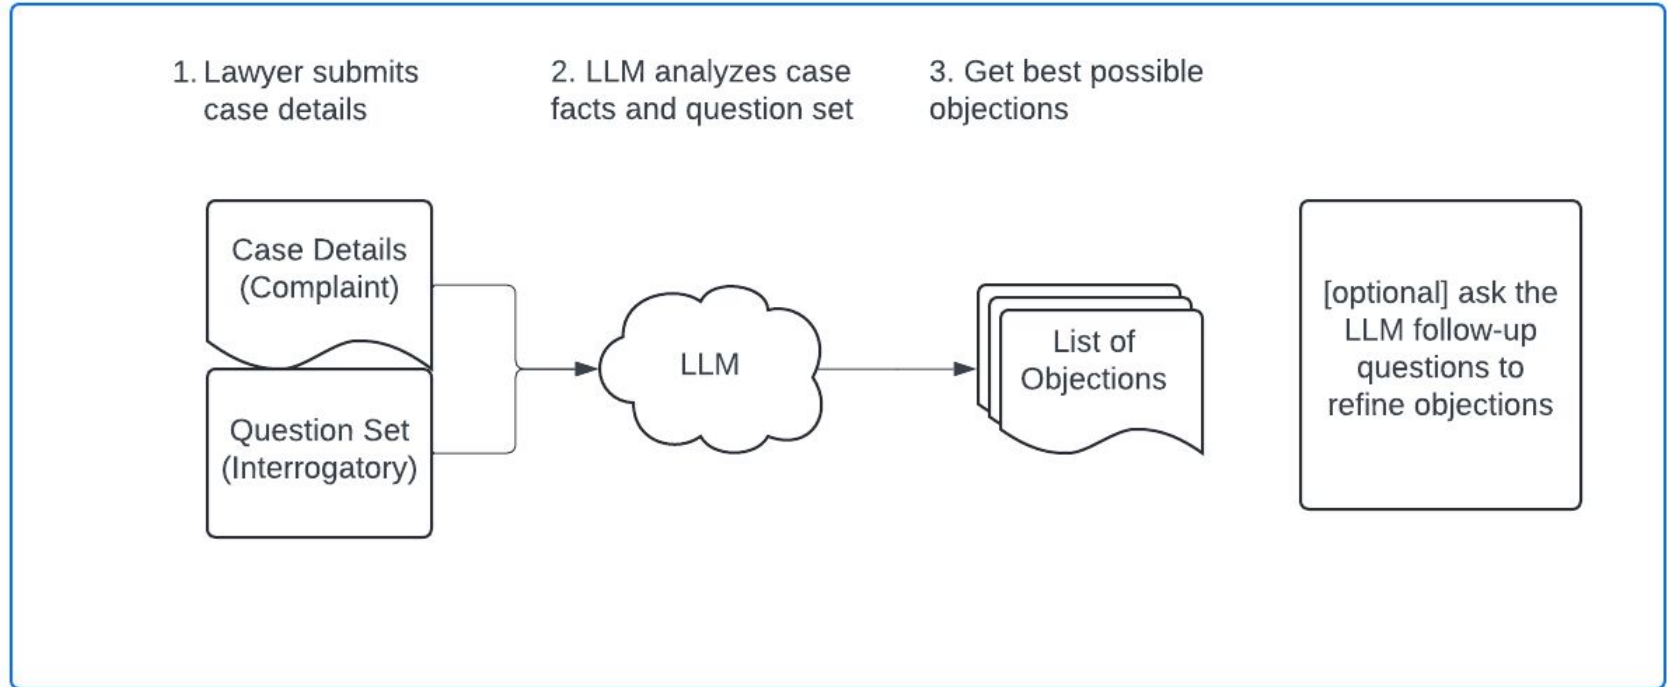

CURRENTLY
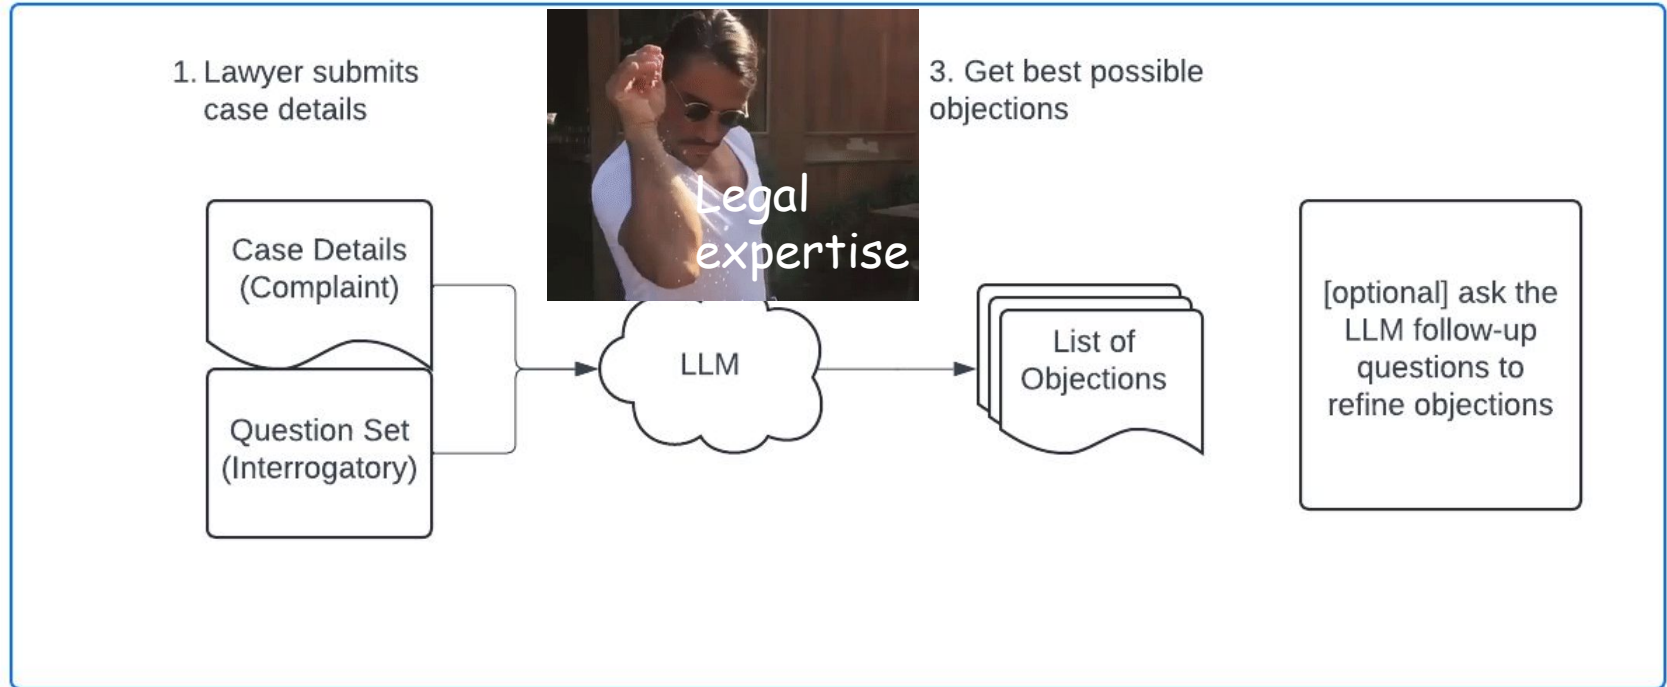

1-2 DAYS

WITH INTERROG.AI

1-2 **MINUTES**

RISKS

-Failure to respond results in an automatic admission

-Failure to object *properly* results in an objection being thrown out

Prototype Flow

1. Lawyer submits case details

2. LLM analyzes case facts and question set

3. Get best possible objections

Case Details (Complaint)

Question Set (Interrogatory)

LLM

List of Objections

[optional] ask the LLM follow-up questions to refine objections

Prototype Flow

List of Objections

[optional] ask the LLM follow-up questions to refine objections

DEMO!

Impact

PROFITABLE

- Sell to plaintiff-side attorneys and solo practitioners
  - Greatly increases productivity for solo practitioners with a high volume of cases who work on a **contingency** (as opposed to hourly).
    - Instead of spending 1-2 days on objections for every single case, our model can provide objections within ___ minutes.
- Sell to law firms
  - Could be built out to provide objections *specific to the firm's style and language* based on firm's historical interrogatories, objections, precedent.
  - Teaching tool for first-year associates

SOCIAL IMPACT

- Serve for legally-underrepresented parties
  - Landlord-tenant

Vision beyond MVP

- Ingestion of data from various sources using RAG
